Not sure who this person is or the nature of their interest.

Is there info on the website regarding EPA sampling data from these pits or would this be the State?

Subject: pavillion shallow waste sites

Dear Richard,

The EPA's Pavillion report states that there are at least 33 surface pits previously used for the storage of drilling and other waste, but provides no additional detail beyond the 3 shallow monitoring wells. The report also indicates the EPA has been investigating these sites. Please let me know how I can get more info regarding these sites. Specifically, I'd like a map and any sampling data you have collected.

Best,
Tom
